ABOUT ME

Information Technology graduate with practical experience in Artificial Intelligence and Machine Learning. Passionate about AI research, particularly in AI agents, large language models and robotics. Developed multiple AI projects including a CNN-based plant disease detection system and an AI-powered job matching platform. Seeking a Master's degree to pursue advanced research in Artificial Intelligence and contribute to innovative AI solutions.

EDUCATION AND TRAINING

Bachelor of Science Information Technology

University of Education Lahore [22 Sep 2022 – 15 May 2026]

City: Lahore | Country: Pakistan | Final grade: 2.97/4.0

Software Engineering
Algorithms
Database Management
Web Development
Artificial Intelligence
Fundamentals

WORK EXPERIENCE

🏢 CodeAlpha (Remote)

AI Intern

[Aug 2026 – Sep 2026]

Completed intensive remote internship focused on practical AI and NLP applications. Developed AI Language Translator and FAQ Chatbot using Python and NLP techniques. Gained hands-on experience in Natural Language Processing, machine learning model development, API integration and practical AI application design.

Key Skills Applied: Python, NLP, Machine Learning, FastAPI, API Integration

SKILLS

Python / Machine Learning / Computer Vision / Deep Learning / TensorFlow / Git / Version Control / OpenCV / Numpy / Git

PROJECTS

[Sep 2025 – May 2026]

PlantGuard - AI Plant Disease Detection System

Developed a CNN-based computer vision system to detect plant diseases from leaf images in real-time. The system achieved high accuracy in multi-class disease classification.

Technologies: Python, TensorFlow/Keras, YOLO, OpenCV, PIL, Streamlit, NumPy, Pandas

Key Achievements: • Designed and trained CNN models for plant disease classification • Implemented real-time

image processing pipeline• Built interactive web interface for end-user accessibility• Achieved reliable classification accuracy across multiple disease categories

Link: <https://github.com/muhammadnaveedgurmanii-png/PlantGuard>

[Jul 2026 – Current]

AI JobMatch - AI-Powered Job Matching Platform Full-stack job matching platform integrating AI-driven algorithms to recommend suitable job positions based on candidate profiles.

Technologies: Python, FastAPI, SQLite, SQLAlchemy, REST APIs, Machine Learning

Key Achievements:• Built backend API for candidate and job data management• Implemented matching algorithm using similarity metrics• Integrated API connections for real-time processing• Currently improving algorithm efficiency

CERTIFICATIONS

[CodeAlpha, Sep 2026]

AI & ML Internship Certificate Completed intensive remote AI internship with focus on practical AI development, NLP, and API integration.

Mode of learning: Online
